**2<sup>nd</sup> INTERNATIONAL CONFERENCE ON SUSTAINABILITY SCIENCE**

**PRESS RELEASE**

# **ICSS 2010**

## **INTERNATIONAL CONFERENCE ON SUSTAINABILITY SCIENCE**

**SAPIENZA UNIVERSITY OF ROME  
JUNE 23rd-25th 2010**

The second edition of the International Conference on Sustainability Science will be held in Rome on June 23rd, 24th, 25th at **Sapienza University of Rome**, with the support of Institute for Sustainability and Peace (UNU ISP) of the **United Nations University**, Interuniversity Research Centre on Sustainable Development (CIRPS) Sapienza University of Rome, Integrated Research System for Sustainability Science (IR3S) of **University of Tokyo**, School of Sustainability of the **Arizona State University**

After the Tokyo successful edition in February 2009, thanks to the remarkable commitment of all the partners involved, in 2010 the Conference sets the double goal to strengthen the role of "**Sustainability Science**" in the academic community and, at the same time, to get industry representatives, civil society, top managers of important companies, the decision makers of public institutions to meet the ones who are in charge of the most authoritative scientific research centres on sustainability. Final goal of the conference is to spread sustainability science through sharing practical and scientific knowledge beyond academic borders.

The research areas identified by the scientific committee bring all the members of Sustainability Science's network to consider carefully the following issues: complex human-environment relations, environment conservation, life quality, opportunities of the new generations, global and local sustainability governance, economic progress and innovation, development equity and sustainability, development and sustainability indicators, corporate social responsibility, use of resources and their consumption.

## 2<sup>nd</sup> INTERNATIONAL CONFERENCE ON SUSTAINABILITY SCIENCE

ICSS2010 is a turning point for the consolidation of Sustainability Science. Besides the plenary and thematic sessions featured by scientific content, two Panels will put great emphasis on companies and civil society, with the aim to share practical and scientific knowledge with the development and other communities and work jointly on practical solutions to the problems of sustainability.

Participation is free previous registration on the website
