

**ICSS 2010**

**Session VI**

## **Session IV(a) – Synthesis and Crosscutting issues**

**“from Tokyo to Rome”**

Sander Van Der Leeuw (Co-Chair) - Manage panel and audience discussion

Masaru Yarime - Purpose and accomplishments of Tokyo meeting

Francesca Farioli – Objectives and Organization of ICSS 2010 Sessions.

Tony Cortese - Crosscutting issues

## **Session IV(b) – Future of Sustainability Science**

**“from Rome to Arizona...and beyond”**

Jim Buizer (Co-Chair) - Manage panel and audience discussion

Sander Van Der Leeuw - Innovation in Science and Education for Sustainability

Francesca Farioli - New concepts. Framing a work plan

Keishiro Hara - Addressing Context: Challenging Epistemology and Methodologies

Rob Melnick - Bridging knowledge and solutions; role of academia to affect policy

**Identifying Gaps...toward developing a Work plan:  
What should we do over next 18 months to advance sustainability science?**

**Identify 3 broad areas for feedback from audience:**

- 1) What are Knowledge gaps and how should these be filled?
- 2) What are Barriers (institutional, methodological, cultural, behavioral) to implementation that have not been identified?
- 3) What are practical approaches to bridge the knowledge to action gap?

Related to the above 3 questions, and considering a practical work plan coming out of this meeting:

**What do you volunteer to do in the above 3 over the next 18 months?**
